

Atlanta Clinical and Translational Science Institute (ACTSI)
Clinical Interaction Network (CIN)
Cost Recovery Model

Draft Policy as of 6/28/11

Protocols that request research study support from the ACTSI CIN are subject to applicable fees according to the published CIN cost recovery model. The fees apply to industry-initiated, non-federal, studies and may pertain to investigator-initiated industry supported studies as well. The fees should be used for budget development to justify requests for CIN support from sponsors for industry supported studies being conducted on the CIN.

Cost Recovery Model for the ACTSI Clinical Interaction Network (CIN)
 Emory University Hospital (EUH), Clinical Interaction Site (CIS)
 Fees applicable to SAC approved, industry-initiated (non-federal) studies
